Changing mindset
Advocacy at the community level

Karine Baghdasaryan

Armenia Inter-Church Charitable Round Table Foundation
27 April, 2021
ADVOCACY

- Why we talk about advocacy? Because advocacy brings about change!
- If you’ve ever tried to promote an issue you care about, you’ve engaged in advocacy.
- I am presenting Church and Round Table advocacy efforts related to environmental protection on community level, accomplished through supporting of projects and/or raising public awareness.
Church

- Social surveys among Armenian population show that Church is the most reliable and respected institution in Armenia.
- In the course of centuries Church has been able to influence people and communities for real change.
Tatev monastery, IX century
Andastan

- “Andastan” means cultivated land
- A Ritual of the Armenian Church, carried out in the fields and gardens
- It is blessing the four origins of the world, four corners of the earth. Blessing of fields, gardens and valleys through which the clergymen blesses the growing plants and trees with cross so that they may bring plenty of fruits and be saved from all kinds of natural disasters.
How the old Church tradition of caring for environment transferred in our time

- Projects on introduction of environmental problems in social communal centres under the auspice of the Church
- Raising interest towards environment (trainings)
- Practical work on addressing environmental challenges

Result: Advocacy on community level

How: step by step, from simple to complicated
Social centres

Introduction of environmental problem in social communal centres under the auspice of the Church

Step by step
- During painting classes environmental challenges reflected
- Tree planting, gardening, waste cleaning
- Classes on environment
- Useful things out of waste
- Solar panels

fresh or not processed food (for saving energy)
local products
organic
eggs of tree and “not imprisoned” hens

THE PROGRAM WAS FINANCED BY
Results

- Changes on individual level, rousing interest in youth towards environment
- Changes on communal level, rousing interest in communities towards environment
- Social centres initiated by Church structures are gradually becoming agents for improvement of communal life.
- Solar panels appeared in the surrounding communities Church has become a leader of the green energy movement in Armenia

We started with simple and easy things, the result is interesting, inspiring and useful.
Thank you for attention and questions!
